Why is CISSP important?

Awarded by (ISC)², CISSP (Certified Information Systems Security Professional) has been compared to a master's degree in IT security and is globally accepted as the qualification of choice for senior cyber security consultants, managers and directors.

Achieving CISSP will help you gain the knowledge to enhance your job performance and improve your contribution to your organisation. Many government and regulatory bodies require CISSP certification for certain positions.

Earning the CISSP qualification is an important step in developing a career as a senior information or cyber security manager/director and opens the door to roles with a higher salary and enhanced job prospects.

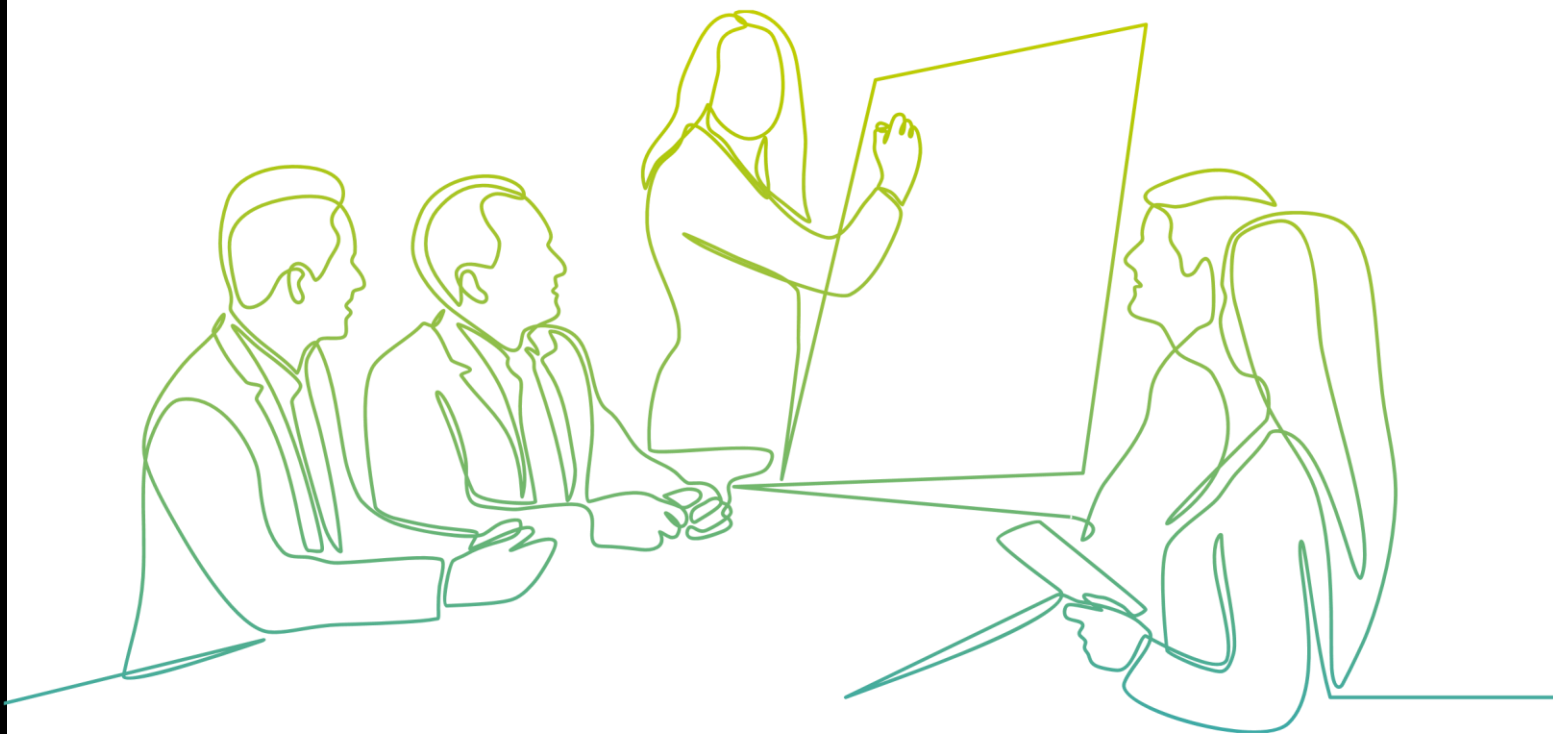

In an increasingly digital world, there is an inexhaustible demand for qualified professionals to protect organisations from an ever-increasing number of cyber risks.

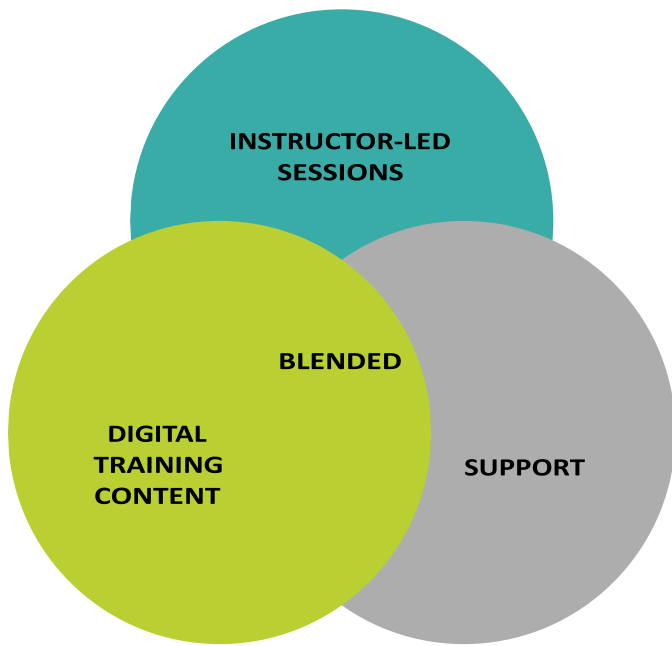

Meanwhile, the cyber security industry offers generous salaries, plenty of room for career development and enough variety between job roles to suit almost any set of skills.

Despite the industry's growth in recent years, there remains a staggering shortage of qualified professionals. As a result, there is a huge advantage for people trying to further their careers and organisations looking to upskill their staff.

Whether you're at the start of your career or a veteran, if you want to take and pass the CISSP exam, a guided achievable learning journey that blended delivery offers should be your first port of call.

What is blended learning?

Levithan Technologies offers learners and instructors an improved educational experience by combining instructor-led sessions, guided digital content, mentoring, tools, resources and applications.

It is shown to expand reach, increase engagement, provide useful resources, facilitate collaboration and simplify assessment. This helps learners to involve more senses during the learning process and provides more tools to help with study.

Levithan Technologies is best delivered in a 'learn over time' programme, allowing delegates to take learning one step at a time, with a view to mastery of each subject while accommodating the challenges of a busy work and home life.

Our unique 40 Hrs CISSP Blended Online/Physical Training Course

Our blended training course is designed to deliver learning that is achievable and sustainable in an extremely busy work and life schedule. Instead of typical block classroom training, this course uses a 'flipped classroom', which combines guided digital content with instructor-led sessions so you have more time to absorb and understand each of the CISSP knowledge domains.

We have combined instructor-led, digital content and support features to create the ultimate truly blended learning experience. We start with an assessment of your knowledge and a one-to-one meeting with our expert instructor to develop your personal learning plan.

We ask you to commit to a minimum of two hours of learning per day.

This blended course includes everything you need to confidently pass the CISSP exam and embed the learning, building a more effective understanding of information and cyber security management.

Course Duration: 40 Hrs

Mode of Training: Offline

Course features

INSTRUCTOR-LED SESSIONS

Weekly instructor-led sessions, including group discussions, Q&A sessions, hands-on exercises and guidance on next steps.

DIGITAL CONTENT

12 months of access to over 70 hours of digital content, including exercises, flashcards, mind maps and practice exams – all available on your phone, laptop, tablet or PC.

ASSESSMENTS

Pre- and post-topic assessments that help track your progress and identify areas that require improvement.

ONE-ON-ONE MENTORING

Four half-hour, one-on-one mentoring calls to devise a personalised study plan.

GLOBAL CONNECTIONS

Network with global learners and benefit from peer support.

Q&A FORUM

Get support from peers and instructors 24/7.

GROUP WORK

Work with your peers on topics to further embed your learning.

EXAM STRATEGIES AND TECHNIQUES

Learn the right approach to answer the questions and pass the new CISSP CAT (computerized adaptive testing) exam on the first attempt.

SUPPORTING MATERIALS

Get everything you need to support your learning, including a CISSP book, digital content and flashcards.

DESIGNED TO HELP YOU SUCCEED

You will receive one-on-one mentoring, reminders, progress updates, chasers and lots of encouragement!

Why choose blended learning?

- **Tailored, mastery-based learning** – Focus on what you need to study, and guided by an expert, work until you master the subject.
- **Better learning outcomes** – The blended delivery model improves learning outcomes by embedding the required knowledge and developing successful exam techniques and skills. This results in higher first-time pass rates compared to traditional ‘cram-and-go’ learning.
- **Work around lifestyle challenges** – A manageable minimum of one hour of learning per day over 13 weeks allows you to fit your study around work and home commitments.
- **Global networking and peer support** – Attend the instructor-led sessions with learners from around the world. Learn from other learners’ industries and experiences, build connections and share best practices.
- **A more manageable programme** – Study using instructor-led guidance and digital resources in a relaxed and low-stress format.
